

Alemayehu Mekonen

📍 Sioux Falls, SD 57105 📞 605-400-8405 ✉ ealex86@gmail.com 🔗 LinkedIn

I am Alemayehu, a passionate technologist and Telecommunications engineer who loves computer Networking troubleshooting and problem solving. I am looking for an entry level Network and System specialist position.

Skills

- **TECHNICAL** - Computer Networking | Routing Concepts | Subnetting and device configuration | Operating Systems (Windows, Linux) | Remote Connection | Virtualization | Software Management
- **PROGRAMMING** - C | C++ | Visual C# | JAVA | HTML | CSS | PYTHON | SQL.

Experience

DECEMBER 2019 TO PRESENT

Adjunct Computer Programming and Networking Instructor

Southeast Technical Institute - Sioux Falls, SD

- I taught students Visual C#, Computer Networking (CCNA1) and Networking Electronics.
- Mentored, organized and supervised students for their career paths.

Intern Fixed Access Network Engineer

ethio telecom, Addis

Ababa – Ethiopia

- Installed, configured and maintained LAN and WAN networks and networking equipment including ADSL modems, EPONs, GPONs, Routers, MSANs and MSAGs using Fiber Optic and Copper cables.
- Implemented a project that tracks the location of MSAG and MSAN

Education and Certifications

BS in Electrical Engineering (Telecommunication Engineering after USA evaluation)

Addis Ababa Science & Technology University - CGPA 3.87/4.0

- **Courses** - OOP, Data Communications and Computer Networks, Advanced Computer Networks, Switching and Intelligent Networks, Wireless and Mobile Communication, Communication Systems, Telecommunication Networks.

B.A in Computer Science (three courses left)

CGPA 4.0/4.0

Augustana College(SD)

- **Courses** - Computer Science 1, computer Science 2, computer Science 3, computer science 4 (Advanced data Structure) operating system and Ethical issues in technology. I transferred credits from my Electrical Engineering degree as a result I will graduate from Augustana after taking three more courses.

Google IT Support Professional Certificate

Google – Coursera

- An online program offered by Google. It consisted of five courses which included hands-on, practice-based assessments, teaching foundational skills in troubleshooting, networking, operating systems, system administration and security. I completed the first course and most part of course 2 and course 3.

Computer Hardware-Software maintenance and Networking SATCOM technology Institute

- I have learned how to maintain both hardware and software failures and Doing server based Networking for 6 months.
